## Overview

IntuneApp: Desktop Company Files  
Puts a Company Files folder on company computers.

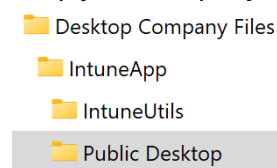

Public Desktop

This package will create puts a Company Files folder on company computers. The folder will be placed in the read-only Public Desktop folder (C:\Users\Public\Desktop). This is a machine-based folder that all users of the computer will see mixed in with their own desktop.

### How to

Drop your company files into the Public Desktop folder within the app

If you have previously deployed a file (or folder) that you want removed, add it to Desktop Company Files ToRemove.csv
