LocalAdminsAddRemove Readme

Overview

An easy way to temporarily add a user as an administrator of their own machine.
Self-removes in 240 hours (10 days).

```
----------------------------------------------------------------------
LocalAdminAddRemove.ps1 v2022-10-27                       s PSver:5.1

Adds user as local admin, with option to remove in n hours (see .xml file to adjust).

----------------------------------------------------------------------
                        Local User: /
                        IsLocalAdmin: No
              AdminRemove is scheduled: No (using AdminTemp)
                    AdminTemp removes in: 72 hrs (if scheduled)

Choose an action for LocalAdminAddRemove.ps1
Note: Can be passed as an option eg: LocalAdminAddRemove.ps1 -Action AdminAdd

1 AdminAdd            to add local admin rights indefinitely.
2 AdminAddTemp        to add local admin rights that expire in 72 hours.
3 AdminRemove         to remove local admins.
X Exit
----------------------------------------------------------------------
```

Steps

1. Copy the folder somewhere temporarily (Downloads)
2. Run the .cmd (NOT as admin but as the user you want to elevate)
3. Choose option 2 *AdminAddTemp*
4. Logout (it takes effect on the next logon)
